

Jinhe Wong

Wang Jinhe, was born in 1942, from Yuzhou City Shenhou town, the inheritor of Henan Province's intangible cultural heritage, the master of Chinese traditional crafts.

Just as all the Jun porcelain craftsmen's road, he entered into the state ceramics factory then at the age of 16. In 2005, Wang Jinhe built his own kiln in a deserted plant and named it "Tianhe Workshop" with the meaning of "work of nature, unity of heaven and man".

Through several decades of exploration, Wang Jinhe utilized the formula features, tension, fusion requirements, contraction proportion, chemical reaction in different temperatures, physicochemical transformation effect in different atmospheres of all kinds of glazes to form his own style. In his works, we can see the features of traditional Jun porcelain as well as his own style.

He thought: "Jun porcelain's beauty lies in shape, more in glaze color. Jun porcelain's features lie in "one color into kiln, being colorful out of kiln". Jun porcelain craftsmen should constantly explore the beauty of Jun porcelain's glaze color, be committed to firing the glaze color never seen. No need of words, works will prove."
